

From Smog to Smarts

Unreliable data with long lead times was slowing Metlink's decision-making. With NZ's Net Zero 2030 target, and buses contributing 30% of Wellington's carbon footprint, Metlink turned to netBI for a solution.

1.3 Million trips per year

35 Million pax trips per year

30% of Wellington's carbon footprint

Bus Emissions Reporting Tool

CO₂ by Route

Network Fuel Consumption

Service Operator Emissions per hour

Engine Type Emissions per KM

100+ metrics at your fingertips

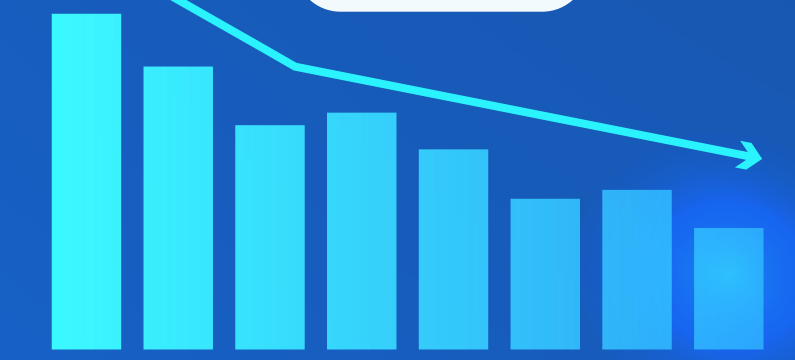

Get powerful insights for real-world results with netBI

Deploy **energy efficient** buses to highest emission routes

Advanced automation reduces your emissions reporting process from **months to minutes**

Fast track meeting your **Net Zero** targets

EMISSIONS TREND
